

THE ASHDRACULA BOOK OF BLOOD

LITEPAPER • CHAPTER I • DRAFT v0.9

THE FIRST DRACULA CAT FROM TRANSYLVANIA

A community meme-token concept born from a very real cat.

PRIVATE PRE-LAUNCH DRAFT — NOT FOR PUBLIC DISTRIBUTION

READ THIS BEFORE THE LEGEND

Document status. This is the creative/project litepaper for AshDracula. It is not represented as a MiCA-compliant crypto-asset white paper, prospectus, legal opinion, or investment document. Legal classification, offer structure, launch venue and any regulatory filings must be confirmed before public launch.

No promise of value. \$ASHDRACULA is intended as a community meme token. Nothing in this document promises profit, price appreciation, yield, revenue share, passive income, redemption value or financial return.

High risk. Crypto-assets can lose part or all of their value, may be illiquid, may not remain transferable, and can be affected by smart-contract, wallet, market, regulatory, operational and third-party risks.

Future concepts. Merchandise, collectibles, Draculize My Cat, community experiences and potential AI-powered products are creative directions only unless and until separately launched. They are not guaranteed and do not create a claim on project revenue.

For an EU public offer/admission to trading, MiCA may require a separate formal crypto-asset white paper with prescribed disclosures, risk statements, notification/publication steps and machine-readable formatting. Obtain qualified EU legal advice before launch.

01 — MEET ASH

YES. HE'S REAL.

Before the cape. Before the castle. Before the token. There was Ash — a real grey cat from Transylvania with amber eyes, serious sleeping habits and very little respect for daylight.

The internet gave him a cape. Ash became AshDracula: the original Dracula Cat and the central character of this universe.

ONE REAL CAT. ONE VERY BAD RELATIONSHIP WITH DAYLIGHT.

02 — THE LEGEND

Somewhere in the mountains of Transylvania, a grey cat woke up, put on a cape and opened a chart. He has not slept since.

AshDracula is designed first as a character and community culture, not merely as a ticker. The token is one layer of a broader creative universe built around a real cat, memes, community-created Dracula Cats, physical merchandise and future interactive experiences.

THE UNIVERSE

ASH — the real cat.

ASHDRACULA — the original character/IP inspired by Ash.

\$ASHDRACULA — the community meme token.

THE COVEN — the community and its Dracula Cats.

DRACULIZE MY CAT — a planned creative experience that transforms a user's own cat into a Dracula Cat while preserving its unique appearance.

Ash remains the original. Community cats join the universe; they do not become AshDracula.

03 — WHAT IS \$ASHDRACULA?

\$ASHDRACULA is intended to be the community token of the AshDracula universe. It is not equity, debt, a claim on AshDracula intellectual property, a claim on merchandise revenue, or a promise of future financial performance.

THE COVEN PERKS

Subject to future implementation and applicable law, the community direction may include community voting, promotional airdrops or giveaways, early access to limited merchandise or collectibles, community-only drops, and special AshDracula experiences.

No staking at launch. No APY, yield, revenue sharing or guaranteed token-holder benefits are promised.

Potential features can change, be delayed or be cancelled. Holding \$ASHDRACULA should never be presented as guaranteeing access, financial value or delivery of future products.

04 — INSIDE THE CRYPT

PROPOSED TOKENOMICS — 1,000,000,000 TOTAL SUPPLY

ALLOCATION	%	TOKENS
Launch Liquidity	70%	700,000,000
Community / Rewards	15%	150,000,000
Marketing	7%	70,000,000
Airdrops / Giveaways	3%	30,000,000
Team	3%	30,000,000
Reserve	2%	20,000,000
TOTAL	100%	1,000,000,000

The allocation above is the current project plan and must match the final on-chain configuration. If the launch mechanism requires a different allocation, this document must be updated before publication.

Do not claim liquidity is locked or burned until that status is actually verifiable on-chain.

05 — VESTING & LIQUIDITY

Team — 3%: 12-month cliff followed by 12-month linear vesting.

Marketing — 7%: 20% available at token generation; remaining 80% planned to vest linearly over 12 months.

Airdrops / Giveaways — 3%: 25% available at token generation; remaining 75% planned for gradual release over 6 months.

Community / Rewards — 15%: planned gradual release over 24 months based on community growth and campaigns.

Reserve — 2%: 12-month lock followed by 24-month linear vesting.

Launch Liquidity — 70%: allocated to launch liquidity under the final launch mechanism. Exact LP lock/burn status, venue and on-chain references will be published only after they are known and verifiable.

FINAL ON-CHAIN DETAILS OVERRIDE THIS DRAFT. The public version must be reconciled against actual wallets, vesting contracts and launch mechanics.

06 — THE COVEN

ASH WAS THE FIRST. HE WON'T BE THE LAST.

The Coven is the community layer of the AshDracula universe. The idea is participation: create memes, photograph cats, contribute art, join campaigns and help build a recognizable internet culture around the original AshDracula character.

Community rewards, if used, should be tied to transparent campaigns and eligibility rules. They are promotional/community distributions, not interest, yield or compensation for holding the token.

THE COVEN WALL

A future gallery can showcase community-submitted Dracula Cats. Any counters, participation statistics or testimonials should reflect real submissions only — never fabricated activity.

07 — DRACULIZE MY CAT

YOUR CAT. OUR CAPE. ONE VERY QUESTIONABLE TRANSFORMATION.

Draculize My Cat is a planned creative tool: a user uploads a photograph of their own cat and receives an AshDracula-universe illustration. The cat should retain its breed, markings, fur colour and recognizable features while gaining the visual language of the universe — gothic cape, medallion, moon, bats and Transylvanian atmosphere.

Possible outputs may include profile pictures, posters, stickers, apparel or collectibles. These are future concepts, not launch promises.

ASH WAS THE FIRST. YOUR CAT COULD BE NEXT.

08 — ESCAPE THE BLOCKCHAIN

For humans: T-shirts, hoodies, caps, mugs, stickers and an AshDracula plush are creative merchandise directions.

For cats: future concepts include a Dracula cape, collar, medallion and the AshDracula Transformation Kit. Physical pet products must not make unverified safety or comfort claims; final products would need appropriate design, materials, testing and warnings.

Merchandise and IP revenue are separate from the token. Token holders do not receive ownership of AshDracula IP or a share of merchandise/product revenue merely by holding \$ASHDRACULA.

09 — THE PROPHECY

CHAPTER I — THE AWAKENING

AshDracula awakens. The official community opens. \$ASHDRACULA launch, subject to final legal and technical readiness.

CHAPTER II — THE COVEN

Memes, community contests, creative campaigns, giveaways and community growth.

CHAPTER III — RETURN TO TRANSYLVANIA

Real-world Ash content, Transylvanian adventures and storytelling around the cat behind the legend.

CHAPTER IV — ESCAPE THE BLOCKCHAIN

Explore limited apparel, merchandise, collectibles, plush concepts and cat accessories.

CHAPTER V — THE COVEN RISES

Explore Draculize My Cat, the Coven Wall, personalized artwork and potential interactive or AI-powered AshDracula experiences.

THE PROPHECY IS A CREATIVE DIRECTION, NOT A DELIVERY GUARANTEE. Timelines and features may change or never launch.

10 — TECHNOLOGY & TRANSPARENCY

Network: Solana (planned).

Token standard / mint: To be confirmed at launch.

Official contract: REVEALED AT LAUNCH.

Trading venue: To be confirmed.

Mint authority: To be published after final configuration.

Freeze authority: To be published after final configuration.

Liquidity status: To be published with verifiable on-chain references.

Team / vesting wallets: To be disclosed where appropriate after final setup.

Never identify a token by name or ticker alone. Names and tickers can be copied. The official mint/contract address published through ashdracula.com and official channels is the authoritative identifier.

The project should publish only claims that can be independently verified. No fake holders, fake volume, fake partnerships, fake liquidity status or fabricated community counters.

11 — RISKS

Market risk. Meme tokens are highly speculative and can experience extreme price volatility or lose all value.

Liquidity risk. There may be insufficient liquidity to buy or sell at a desired price, or liquidity may disappear.

Technology risk. Blockchain networks, wallets, smart contracts, launch platforms, bridges, websites and third-party services can fail, be exploited or become unavailable.

Copycat / impersonation risk. Other parties can create tokens with identical or similar names, tickers, images and social profiles.

Regulatory risk. Laws, regulatory interpretations and platform policies can change. Availability may differ by jurisdiction.

Operational risk. Planned features, merchandise or experiences may be delayed, changed or cancelled.

Security risk. Users are responsible for wallet security, transaction verification and avoiding phishing or fake contract addresses.

Never spend more than you can afford to lose. This document is informational and does not constitute financial, investment, legal or tax advice.

12 — THE OFFICIAL CRYPT

Website: ashdracula.com

Official contract: REVEALED AT LAUNCH

Official social channels: To be inserted before publication.

Document version: Draft v0.9 — 28 August 2026

**THERE IS ONLY ONE ASH.
EVERYTHING ELSE IS A COPYCAT.
LITERALLY.**
